I am a 4th year computer engineering student at Istanbul technical university. There is only one course left for me to graduate and I am graduating at the end of this semester. I can describe myself as a person who aims to constantly improve, tries to follow and apply new technologies, and has very good social skills. I have numerous degrees with teams or individuals in various sports branches at high school and secondary school level. Besides, I think about special projects for myself and design websites in my spare time.
